Objective

Computer Science graduate seeking an entry-level Business Systems Analyst position where I can apply my knowledge of business process analysis, requirements gathering, systems analysis, and software development while contributing to organizational success and continuously developing my skills

Project Experience

E-Clearance Management System

Business Systems Analysis & Full-Stack Web Development

- Gathered and analyzed user requirements for a digital clearance process.
- Created Use Case Diagrams, Activity Diagrams, and ERD to support system design.
- Developed a web-based clearance management system using HTML, CSS, JavaScript, PHP, and MySQL.
- Reduced manual processing by digitizing student clearance requests.

Smart Classroom Seat Generator

Business Systems Analysis & Front-End Development

- Identified classroom seating challenges and translated them into system requirements.
- Designed an automated seating generator using JavaScript.
- Created responsive user interfaces using HTML5 and CSS3.
- Improved seating assignment efficiency through automation.

Education

Bachelor of Science in Computer Science

St. Clare College

2022–2026

Technical Skills

- Business Analysis: Requirements Gathering, Business Process Analysis, Systems Analysis
- System Modeling: Use Case Diagram, Activity Diagram, Entity Relationship Diagram (ERD)
- Programming: Java, Python, JavaScript (Basic)
- Web Development: HTML, CSS, PHP
- Database: MySQL
- Tools: Microsoft Office, Google Workspace, Visual Studio Code, [Draw.io](https://draw.io), Sublime Text

Certifications

- JavaScript Algorithms and Data Structures – freecodeCamp
- Java Programming 2 – CodeChum
- Introduction to CSS – TESDA
